

Site Profiler® Version 1.6
Release Date November 27, 2002

New Features and Enhancements

Better Control Over Colors: Site Profiler 1.6 exposes most all of the colors used by the system for developers to control in the config file. This includes the background, foreground and highlight colors for the screens, input/output elements, the left side and right side toolbars, and the review tables.

Support for Custom Screen Buttons: Site Profiler 1.6 enables developers to define their own custom button images for use in dynamic screens. Developers can define up to four images (raised, depressed, mouse over, disabled) for each of the three button types (back, next, generic button).

Support for Custom Profiler Buttons: Site Profiler 1.6 enables developers to define their own custom button images for use in the right side Profiler toolbar. This allows these buttons to be modified to match with any new color palette chosen for an application.

Enhanced Top Toolbar: The top toolbar in Site Profiler 1.6 is now more flexible than ever. It supports both the horizontal and vertical placement of buttons, along with the ability to define any combination of left-justified, right-justified, and background images.

Plugin Interface Enhancements: Site Profiler 1.6 contains several enhancements to the Plugin Interface, including a new plugin type (IOM) for specifying plugins that perform input/output operations on the system, additional interface methods that provide greater capability to plugins, and a mechanism for plugins to be triggered both from the File menu and from dynamic screens.

New and Improved Plugins: Site Profiler 1.6 includes several improvements to the BELT plugin, such as a more expansive set of supported building types and more informative text output. Also included is a plugin that creates new objects by importing an XML file.

Enumeral Outline Interface Element: Site Profiler 1.6 includes a new interface element that supports displaying and selecting from a nested outline of enumerals.

Enhanced Review Tables: Site Profiler 1.6 includes several enhancements to the review tables, including bulleted lists, word wrapping and resizable columns. Review tables can also include a background image for enhanced look and feel.

Enhanced Stability: Site Profiler 1.6 is more stable and reliable than ever, with numerous new fixes and performance enhancements.
