Digital Sandbox Bolsters Its Client Services Team

August 15, 2008, McLean, Virginia – Northern Virginia-based Digital Sandbox, Inc., the market leader in providing risk analytic tools and information products, today announced the addition of Erin Mohres and Jodi Huston to its Client Services Team and the promotion of Adam Trister, J.D. to Director of Client Services Operations. Ms. Mohres and Ms. Huston will be concentrating on delivering solutions to Digital Sandbox’s State and local government clients. Mr. Trister will coordinate all of the firm’s client services operations, working closely with the product team and Risk Analysis Center analysts to ensure smooth delivery.

Ms. Mohres brings emergency management experience from local government and from international non-governmental organizations to the Digital Sandbox team. She directed the City of Fort Lauderdale, Emergency Management Program and prior to that time was an Emergency Management Coordinator for Miami-Dade County Office of Emergency Management. Ms. Mohres also worked for the Latin America and Caribbean Regional Emergency Response and Disaster Mitigation unit of a major international NGO. She is a Certified Emergency Manager (CEM), holds an MA from the University of Miami (FL) and a BA from the University of Illinois at Urbana-Champaign.

Ms. Huston brings considerable experience in the Homeland Security and Federal Contracting market. Prior to joining Digital Sandbox, Ms. Huston specialized in business process re-engineering for customers such as the Department of Homeland Security and Department of Transportation. Ms. Huston holds a BA from The George Washington University.

Mr. Trister joined Digital Sandbox in 2007 from the State of Maryland where he served as the Critical Infrastructure Protection Coordinator. He has been acting in various client services roles, working on projects for Federal, State, and local clients. Mr. Trister holds a J.D. from the University of Miami (FL) and a BA from Rutgers University.

“We are extremely fortunate to have these talented and dedicated professionals on our team at Digital Sandbox” remarked Anthony Beverina, the company’s co-founder and President. “Our clients will benefit greatly from the skills, experience, and professionalism these individuals bring to the table.”

Digital Sandbox, Inc. provides analytic tools and information products to government agencies and large enterprises to enable them to optimize their strategic, policy, and budgetary decisions against the terrorism and natural hazard risks they face. Through the Company’s Risk Analysis Center (RAC), customers can use the Site Profiler® risk management software suite, authoritative data sources, and expert risk consulting, to manage their risks. Since 1988, Digital Sandbox’s analytic risk management solutions have helped customers in the National Security, Homeland Security, and Corporate Security fields to lower their risk exposure, increase their risk management budgets, and maximize their finite resources. Visit Digital Sandbox on the Web at www.dsbox.com.
