

MOBILE COMMANDER

Powered by Digital  Sandbox 7

Specially developed for: Police, Fire, EM, Incident Commanders

Mobile situational awareness from anywhere 24/7.

How it works ▶

Public Safety Feeds Connector ▶
Connect to a wide variety of public safety systems and information sources

Mobile Commander Channel Manager ▶
Create and organize feeds into personalized command channels and prioritize information by user and context

Mobile Command on the iPad®
Highly interactive, personalized mobile command application correlates information from multiple public safety feeds

Features ▶

- ▶ **True mobile situational awareness** – Enable field commanders to have real time access to the same types of information typically limited to fixed operational command centers
- ▶ **Interactive monitoring features** – Designed to allow end users to quickly search, filter and drill down into details as needed
- ▶ **Advanced mobile analysis features** – Include blast effects analysis, ability to add geo feeds from the application, score cut off filtering, user defined distance filters and data refresh intervals
- ▶ **Secure** – Fine grained user and role based access control.

Ask About Our Quick Start Package ▶ Includes end user training, application set up and deployment to other end users.

About DS7 Packaged Applications ▶

Focused public safety solutions, tailored to your needs.

DS7 Packaged Applications are fully configured public safety applications that are ready to be immediately deployed. Each application is fully self contained and includes powerful, yet highly intuitive web and mobile interfaces that require minimal training and hand holding. All applications are a result of Digital Sandbox's industry leading experience in supporting public safety planning and operations at all levels from the National to local levels and incorporate industry guidelines, standards and best practices.

DS7 Packaged Applications are built on the *Digital Sandbox 7 Platform* and have been proven in mission critical public safety operations across the country.

DS7 Packaged Application Catalog ▶

DS7 Packaged Applications provide the industry's most innovative and powerful public safety solutions for planning and operational support in ready to deploy light weight applications ▶

Pre-Incident Fire Planner

Developed especially for: Fire

Online NFPA 1620 compliant pre-incident fire planning system that can be easily integrated with existing public safety

Rapid Damage Assessor

Developed especially for: EOC

Mobile public and emergency management personnel resources, report damages using mobile devices and monitor

CIKR Manager

Developed especially for: Police, Fusion Center Analysts, Fire, EOC

Gather CIKR information, establish asset priority, and systematically assess asset vulnerability to and consequences of a jurisdiction's threats and hazards.

Tactical Response Planner

Developed especially for: Police

Online assessments of critical assets that enables the collection of all relevant information required by police responders to mitigate various threat scenarios.

Mobile Commander

Developed especially for: Police, Fire, EM, Incident Commanders

Mobile situational awareness from anywhere 24/7

Field Reporter

Developed especially for: Public, Police, Fire, EM, Security

Integrate mobile incident reporting applications to your public safety operations

Situation Monitor

Developed especially for: Public safety command centers

Connect multiple public safety systems together for a common operational view
